

POWERBEAT™ Replacement Sensor Instructions

This short instructional sheet is meant to assist you during the replacement of your POWERBEAT™ Sensor.

Our goal is to get you back riding with your POWERBEAT™ and enjoying your data.

If you need any help during the process, we are available through our support team 1-949-346-3050 or support@watteam.com.

Carefully follow the below instructions as they will navigate you through the installation process, while replacing only the relevant sensor/s.

1. Remove the relevant sensor/s from your crank arms. Please watch the following video tutorial on YouTube.

 [Removing the sensors - Watteam POWERBEAT G2](#)

Note: Please make sure to use the gluing accessories included in the kit. Also, remember to remove only the sensor/s that is desired to be replaced.

2. Launch your POWERBEAT G2 app.
3. For already installed POWERBEAT only - clear app data
 - a. Press the  Menu button, Located at the top right corner of the screen
 - b. Scroll down and press **RESET BIKE & PERSONAL DETAILS**.
4. At the welcome screen press  and fill in the necessary details

5. Follow the in-app instructions, while keeping in mind the following tips that we've summarized for you.

- It is mandatory that the bike does not move during the curing process. We recommend gluing the sensor/s and waiting the 24 hours for the glue to dry.
- Gluing process:
 - Make sure the gluing area is thoroughly clean and there is no glue residue on the crank arm.
 - Sand down the crank **even if previously sanded**.
 - After sterilizing the gluing area and silver side of sensor, **do not directly touch them**.
 - Position the sensor on the crank arm as per the 3 Rules.
 - Thoroughly mix the glue. **This is important, attention and time should be dedicated.**
- Note that for the glue to dry in 24 hours, a room temperature of 77°F (25°C) is needed. A room temperature of 50°- 77°F (10°–25°C) will require 48 hours. Less than 50°F (10°C) is not covered by our warranty policy.

At this stage, you should have successfully installed and calibrated your POWERBEAT™.

If you need any help during the process, we are available through our support team 1-949-346-3050 or support@watteam.com.

Regards,

Watteam Support
